Outlook 2022

2022 outlook

“The start to 2022 is characterized by high overall inflation, particularly manifesting itself through significantly higher energy and material costs. In anticipation Cabka announced a round of price increases in the fourth quarter of 2021, effective per January 2022.

However, as these inflationary effects came in even stronger than anticipated, there is an expected delay in the full conversion to the market, impacting our gross margin on the shorter term. That said, supported by further mitigating actions focused on enhancing our product mix and efficiencies, we stick to the mid-term guidance as provided earlier.”
